Experience

Frontend developer

Keeper Solutions

Nov 2023 - Now

I am currently working on a project aimed at offering our clients customizable pages (which they can edit themselves) to advertise open positions within their company. The application features a portal with multiple roles, allowing different levels of access and functionality based on the user's role. Additionally, the app provides an in-depth analysis of benefits that potential candidates are interested in, helping companies tailor their job offers more effectively. I am also working on the backend, using Node.js and Azure Functions to ensure a robust and scalable infrastructure. We are currently in the process of transitioning from Nuxt2 to Nuxt3 to leverage the latest features and improvements of the framework.

Frontend developer

Barrage

Sep 2021 - Oct 2023

I've worked on diverse projects, maintained coding standards in
the frontend team, and created a starter kit for streamlined
project initiation. I've also completed mentorship training,
fostering professional growth in younger colleagues and boosting
team success. These experiences enhanced my problem-solving
skills and promoted collaboration, contributing to our
development success.

Lead frontend developer

Sartura

Jan 2020 - Sep 2021

I've tackled diverse projects with a focus on OpenWrt, utilizing
SNMP and Telnet integrations. Notable achievements include
refactoring an application using the Quasar framework and
implementing a dark mode. As a lead frontend developer, I
managed project planning and task assignments. These experiences
enriched my skills, reinforced my problem-solving abilities, and
taught me to take initiative within the team.

Skills

- VueJS

- NuxtJS

- Vitest / vue-test-utils

- JavaScript

- HTML5

- CSS/postCSS/SaaS

- Quasar

- React

- Node.js

- Azure Functions

Education

School of Economics Braća Radić

2009 - 2013

Faculty of Organization and Informatics

Bachelor degree

2013 - 2017
