Experience

Frontend developer

Barrage

Sep 2021 - Oct 2023

I've worked on diverse projects, maintained coding standards in the frontend team, and created a starter kit for streamlined project initiation. I've also completed mentorship training, fostering professional growth in younger colleagues and boosting team success. These experiences enhanced my problem-solving skills and promoted collaboration, contributing to our development success.

Lead frontend developer

Sartura

Jan 2020 - Sep 2021

I've tackled diverse projects with a focus on OpenWrt, utilizing
SNMP and Telnet integrations. Notable achievements include
refactoring an application using the Quasar framework and
implementing a dark mode. As a lead frontend developer, I
managed project planning and task assignments. These experiences
enriched my skills, reinforced my problem-solving abilities, and
taught me to take initiative within the team.

Skills

- VueJS

- NuxtJS

- Vitest / vue-test-utils

- JavaScript

- HTML5

- CSS/postCSS/SaaS

- Quasar
